Pilkington Spandrel Glass Annealed

Pilkington Spandrel Glass Annealed is the world's first cuttable, opaque, coloured glass cladding panel. Uniquely available from a stock product, it allows flexibility in the choice of colour for the first time.

It is produced in six standard colours, with project-specific as well as corporate colours available. For your individual requirements please contact us.

Pilkington Spandrel Glass Annealed can be used in single or insulated applications. It provides colour harmony or contrast in areas which need to be covered, such as blockwork, columns or suspended ceilings. The choice of colours is as bold as your imagination will allow. Whichever you choose you can be confident that it can be reproduced time and time again whilst also providing an unrivalled reflected image.

Pilkington Spandrel Glass Annealed offers an unrivalled choice of colour. Thanks to its unique and patented design, it also allows you to use, for the first time in external applications, a colour coated annealed glass that is thermally safe in virtually all locations. Please contact us for a free thermal safety evaluation for this product.

Benefits over standard spandrel glass

Improved appearance:

- No toughening distortion.
- Solid, fully reproducible colours with zero light transmission.
- Bespoke & corporate colours available
- As an annealed glass with enhanced properties it does not need heat treating prior to use.

Integrity:

- Even if cracked, due to the unique foil backing, the panel will retain its integrity within the frame. This keeps the building both weathertight and enclosed.

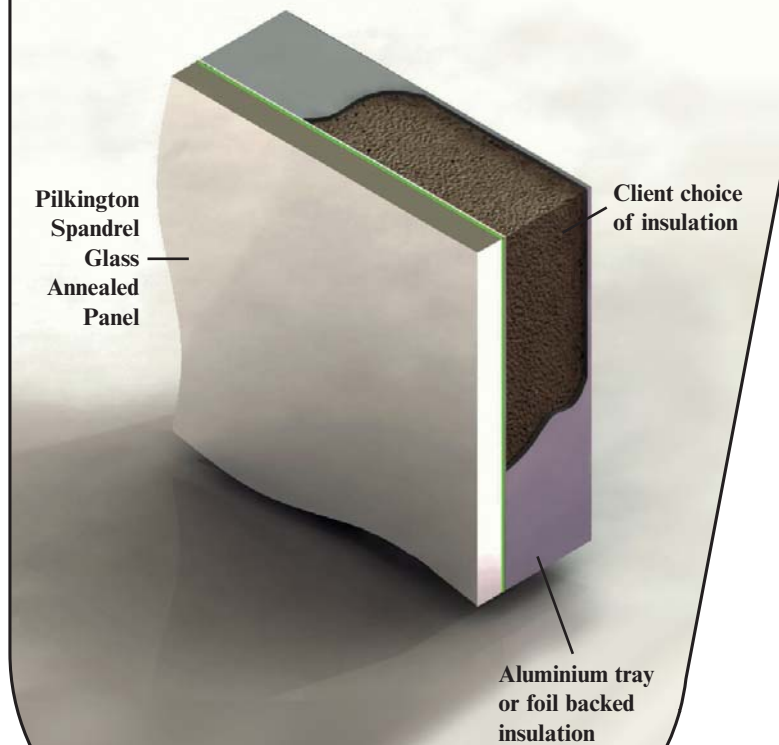

Availability:

- Shorter lead times.
- Can be stocked, cut and edgeworked.

Flexibility:

- Can be used in single applications either insulated or un-insulated.

Pilkington Spandrel Glass Annealed Panel

Comparison between Pilkington Spandrel Glass Annealed and Ceramic-coated toughened glass

Characteristics	Pilkington Spandrel Glass Annealed	Ceramic Toughened
1. Available in any colour. <i>RAL colours / bespoke colours.</i>	yes	no
